

Email

Check and send email messages right from your phone.

Gmail

If you signed into your Google Account when you first set up your phone, you'll be able to send and receive Gmail messages. From the Home screen, just tap  > **Gmail**.

Adding your other email accounts

Use the Mail app to set up and manage your other email accounts such as webmail, POP3, IMAP, or Exchange ActiveSync accounts.

1. From the Home screen, tap  > **Mail**.
2. On the Choose a mail provider screen, choose the type of email account to set up.
If you don't see this screen, press MENU, tap **More** > **New account**, and then choose the type of email account to set up.
3. Enter the **Email address** and **Password** for your email account.
4. Follow the onscreen instructions to finish setting up your email account.

Sending an email message

1. From the Home screen, tap  > **Mail**.
2. If you have several email accounts, choose an account you want to use.

3. On the email account Inbox, press MENU and then tap **Compose**.
4. Tap . Then choose the email addresses of contacts to send to.

You can also directly enter email addresses in the To field, separating them with a comma.

5. Enter the subject, and then enter your message.
6. Tap **Send**.

Capture your big moments

Your phone comes with a 5 megapixel camera with auto-focus feature that lets you capture sharp pictures and record high-definition (720p) videos.

Taking a photo

1. From the Home screen, tap  > **Camera**.
2. Tap  to use the zoom bar so you can zoom in or out first on your subject.
3. On the Viewfinder screen, tap the flash button  repeatedly to choose a camera flash mode depending on your lighting conditions.
4. Frame your subject on the Viewfinder screen.
5. Let the camera auto focus on the center of the screen, or you can touch another area on the screen that you want to focus on.
When you're auto focusing on people, the camera can automatically recognize faces and adjust the focus.
6. Press  to take the photo.

Catch up with friends in your social networks

Friend Stream connects you to your social networks. Share and get updates from friends in popular networks like Facebook and Twitter in a single feed. With Friend Stream, you can easily track your friends' status messages, photo uploads, and more — or comment and post your own.

Get HTC Sync

You can use the HTC Sync software to sync contacts, calendar, and other information between your computer and your phone. Copy HTC Sync from the microSD card that came with your phone and install it on your computer.

1. Connect your phone to your computer using the USB cable that came with your phone.
2. When the Connect to PC screen appears, tap **Disk drive** and then tap **Done**.
3. On your computer, access your phone's storage card which is recognized as a removable disk.
4. Copy HTCSync.exe to your computer.
5. Unmount your phone as required by your computer's operating system to safely remove it.
6. On your computer, double-click HTCSync.exe and follow the onscreen instructions to install HTC Sync.

Visit our support website (www.htc.com/support) from time to time to check for the most recent HTC Sync upgrade so you can download and install it.

Battery saving tips

Here are some things you can do to get the most out of a single charge.

Turning off automatic updates

In some apps such as Weather and Stocks, turn off automatic update:

- Open the Weather app. Press MENU, tap **Settings**, and then clear the **Update automatically** check box.
- Open the Stocks app. Press MENU, tap **Settings**, and then clear the **Scheduled sync** check box.

Turning off wireless functions

Turn off the data connection, Bluetooth, GPS, Wi-Fi, and Wi-Fi Hotspot functions when not in use.

- From the Home screen, press MENU, and then tap **Settings** > **Wireless & networks**. Clear the check boxes of wireless functions that are not in use.
- From the Home screen, press MENU, and then tap **Settings** > **Location**. To turn GPS off, clear the **Use GPS satellites** check box.

- To be able to turn off wireless functions more easily, you can add their respective widgets to your Home screen.

From the Home screen, tap  > **Widget** > **Settings**, and then tap the widget that you want.

For the complete user guide and other helpful resources, go to www.pcdphones.com. Please also read the Safety and regulatory guide that's included in the box.

Before you do anything else, please read this

Charge the battery

The battery in your phone hasn't been charged yet. While your phone is charging, it's important that you do not remove the battery pack. Doing so can damage your phone. Also, please don't try to take your phone apart. (If you do, it may invalidate your warranty.)

Choose a rate plan wisely

Depending on how you use your phone, it can use up a lot of Internet bandwidth really quickly. Before you use your phone, we strongly recommend that you talk to your mobile operator about data rates.

Know about privacy laws

Some countries have strict laws about how and when you can record phone conversations. It's a good idea to find out what the laws are where you live before you use your phone's recording feature.

And finally, a few important words from our legal team (LIMITATION OF DAMAGES)

To the maximum extent permitted by applicable law, in no event shall HTC or its affiliates be liable to you, any user, or third party for any indirect, special, consequential, incidental or punitive damages of any kind, arising in contract, tort, or otherwise, including, but not limited to, injury, loss of revenue, loss of goodwill, loss of business opportunity, loss of data, and/or loss of profits, regardless of the foreseeability thereof or whether HTC or its affiliates have been advised of the possibility of such damages. And in no event shall the total liability of HTC or its affiliates exceed the amount received from you, regardless of the legal theory under which the cause of action is brought. The foregoing does not affect any statutory rights which may not be disclaimed.

Get to know your phone

Before you turn on your phone

Make sure you prepare your phone correctly before you press the POWER button.

Removing the thin film from the battery

1. Hold your phone securely with the front facing down.
2. Starting from the small opening at the bottom of the phone, lift the back cover and remove it completely.

3. Take out the battery and peel off the thin film.

Locating the storage card

The microSD card is already inserted into your phone.

If you need to remove the microSD card:

1. Lift the latch located at the bottom center of the battery compartment to unlock it. Then gently pull the microSD card out from the storage card slot.

2. Press down on the latch to lock it in place.

To insert the microSD card:

1. Lift the latch of the storage card slot, and then carefully insert the microSD card into the slot.
2. Press down on the latch to lock it and secure the card in place.

Inserting the battery

1. Insert the battery, contacts end first, and gently press the battery into place.

2. Replace the back cover.

Charging the battery

Use the supplied power adapter and USB cable to charge your phone.

Set up your phone

When you turn on your phone for the first time, just follow the onscreen instructions to set up your phone.

Be sure to sign in to your Google Account so you can use Google apps like Gmail™ and Android Market™. You can also set up your other email accounts, favorite social networks like Facebook® and Twitter™, and more.

Make your Home screen

The Home screen is highly customizable and extends beyond the screen width, giving you lots of room to add widgets, apps, shortcuts, and folders for one-touch access.

Aside from the main Home screen, you have up to six extra Home panels to add all the things you need. Slide your finger left or right to go to the other Home panels. Or, simply pinch the screen to show the Leap view, and then tap a screen thumbnail to directly go to that screen.

Keep in contact

There are several ways you can add contacts to your phone.

Synchronizing contacts from your online accounts

Sync your phone with contacts in your Google Account, Facebook, and even Exchange ActiveSync account. In the People app, you'll see all your contacts if you're signed in to these accounts on your phone.

If you have not yet signed in, press MENU from the Home screen, and then tap **Settings > Accounts > Add account**.

Adding a new contact

1. From the Home screen, tap > **People**.
2. Tap **Add contact**. Then enter the contact information in the relevant fields.
3. Tap **Save**.

Make your first call

1. On the Home screen, tap **Phone**.
2. Enter the number or contact you want to call, and then tap **Call**.

3. To hang up, tap **End call**.

Send a txt msg

1. From the Home screen, tap > **Messages > New message**.
2. Enter the recipient in the **To** field.
3. Tap "Tap to add text", and then enter your message.
4. When done, tap .

Connect to the Internet

Get online using your phone's data connection or Wi-Fi.

Using a data connection

It's simple. When you turn your phone on for the first time, it should connect automatically to your service provider's data service. Settings for connecting to the data service are already preconfigured on your phone.

Using Wi-Fi

1. From the Home screen, press **MENU**.
2. Tap **Settings > Wireless & networks**.
3. Select the **Wi-Fi** check box to turn Wi-Fi on.
4. Tap **Wi-Fi settings**. Then choose a Wi-Fi network to connect to.

If you select an open network, you'll be automatically connected. If you select a secured network, enter the key, and then tap **Connect**.

Browsing the Web

1. From the Home screen, tap > **Internet**.
2. On the Browser screen, press **MENU**. Then tap the address bar on top of the screen.
3. Enter the web address, and then tap the Enter key .
4. Use finger gestures to browse the webpage and to zoom in or out.
